TO: Minerals File

FROM: Lynn Kunzler, Senior Reclamation Specialist *ly K.*

RE: Site Inspection, Peak Minerals – Azomite Inc., Trace Minerals #1, S/039/001, Sanpete County, Utah

Date of Inspection: June 21, 2001  
Time of Inspection: 10:00 a.m.  
Conditions: Clear, warm  
Participants: Doug Jensen and Lynn Kunzler, DOGM

Purpose of Inspection: Document site conditions while in the area.

No company representative was present during this inspection. Even though no equipment was observed on site, this site has been active in the recent past. The disturbed area had noticeably expanded since the last site inspection. The disturbed area appeared to exceed the 5-acre limit for a small mining operation. During this inspection, we used a Trimble GPS to survey the disturbed area acreage.

Results of this survey showed 5.84 acres of disturbance in Section 4 of Township 17 South, Range 1 West. This exceeds the 5-acre limit for continued operations as a small operation. The operator should be notified of this potential non-compliance, and how he intends to remedy the situation.

Upon return to the office, a review of the file indicated that an amendment to include a ½ acre area in Section 32, Township 16 South, Range 1 West, was approved in August of 2000. This area was not included this inspection.

Several photos were taken to document site conditions.
